

Position: HVAC Maintenance Engineer

Commercial property management company is seeking a Maintenance Engineer for Metro area office buildings. Need personable self-starter experienced in all facets of building maintenance with an emphasis on HVAC. Position responsibilities include, but are not limited to: performing the day-to-day monitoring, inspecting, maintenance, repair and efficient operation of all building systems, equipment, buildings and grounds utilizing several trade skills such as carpentry, plumbing, electrical, painting, heating and cooling. The engineer will be expected to perform routine maintenance and repairs of HVAC, heating, refrigeration, water and energy systems to ensure the effective operation of the facility. The engineer will also oversee and inspect the work performed by outside contractors. Position is for full time days with some overtime and will also be put on "on-call" rotation. Tools and company truck are provided. Competitive wages and comprehensive benefits including medical, dental and 401K. Send resume to ksinks@escomproperties.com.
